

Call for Papers

The annual meeting 2019 of DEGUWA e.V. on Underwater Archaeology

IN POSEIDONS' REALM XXIV

on the topic

Contact Zones: Archaeology between Water and Land Coasts, lake and river shores

will be held in cooperation with the
Academia Mediterranea Halicarnassensis,
the city of Bodrum and Dokuz Eylül University Izmir
under the patronage of the president of the Academia Mediterranea Halicarnassensis

from April 10 through April 14, 2019 in Bodrum, Turkey.

Sea coasts, likewise the shores of lakes and rivers, are transition zones between the elements. Here, harbours were constructed in order to connect the trade routes on water and on land. Yet, there were also many other activities in this contact zones like shipyards, fish farming, the production of marine goods like purple and fish sauce, or the erection of lake dwellings. Shores were secured by structures like bank reinforcements, dams and dykes. Through geological land lift or subsidence, sedimentation and the regulation of watercourses, most of these contact zones have been shifted over the centuries or millennia. Their exploration generally cannot be realised by underwater or land archaeologists alone but requires an interdisciplinary collaboration with physical geography, marine biology or other sciences.

Furthermore, the conference welcomes papers on new archaeological research or new methods and techniques in nautical, underwater and limnic archaeology.

We kindly invite you to send your application for presentations or posters, giving the title and an abstract of 250 words (incl. two images), to the following email address:

mail@deguwa.org

Please submit your application until October 31, 2018.

All contributions will be published in SKYLLIS, journal for maritime and limnic archaeology and cultural history.

Detailed information regarding the academic programme as well as the accompanying events, the locations, accommodation etc. follows during November 2018.
